Subject: stolen Identity

In October I received a notice from my health insurance company (Aetna) that my medical records had been stolen, these records had my ss# on them.

2 months later my bank account has been cleaned out and I am sure more damage has been done. I tried to contact the credit reporting agencies and it is all automated. I cannot put a fraud alert on my accounts, apparently because my information has been changed. I filed a police report and they did not seem interested. I have the phone number of a bogus company that took my money. I have NO MONEY and the bank is telling me they cannot reverse the charges on my account that I will have to dispute them. I need action now! Can you help?

Please call me [redacted]

Sincerely,

[redacted]
