Subject: Theft through Small Business Accounts

Hi-

I would ask that Small Business Credit be viewable and monitor-able.

I had theft where a small business account was opened in my name. I was unable to view this activity on my credit report because it is not reported for Business accounts.

Either have the Business accounts available on personal credit reports or create a Business Only Credit Report people can review.

ALSO – I was unable to file a police report because I could not show that the account was opened on my Credit report even though I had a letter from AMEX. This is not working, how can I ever file a report without credit proof because this is a business theft.

I propose that ANY new account (including Business) must be verified like a PIN number or change of address, where a letter is sent to the last 3 addresses of record for verification prior to opening, that way if someone verifies with my info if I at least also receive the letter I can call and alert the company in the initial stages of account opening.

Thanks!
